Anchorage, Alaska 99501

Dear Ms. Pritchard,

I strongly oppose the following pipeline routing: West from Eureka, down Squaw Creek, turning North West, up Caribou Creek over Chitna Pass into the headwaters of Boulder Creek, across the Chikaloon River, along the base of Castle Mt., across King River, West on the power line to Palmer. This appears to be some 20 miles North of the existing highway. This is most unacceptable.

For more than 40 years I have hunted much of this area. This area of great natural beauty must be managed for quantity + quality of wildlife resources.

Regardless of the difficulties, the pipeline must be routed on the highway right-of-way or South of the highway. The State of Alaska must not allow the present proposed pipeline routing to take place.

Sincerely

Peter M. Probasco
