Re: Glennallen information meeting

Dear Mr. Heinze:

Before we are consumed by so many other projects I want to take a moment to thank you personally for taking the time out of your very busy schedule to visit our community and explain the efforts of ANGDA and its relationship to the Copper Valley.

It is obvious that the impact on Glennallen and the surrounding corridor of the proposed gas pipeline will be substantial for several years to come, both in the construction stage and the ability of our businesses and residents to begin, at long last, to see energy costs drop significantly.

Of course, due to the relationship between the Copper Valley and Valdez area, that benefit will, no doubt, be felt over our entire electrical grid from Paxson to tidewater in Valdez. For that we will all be thankful.

Because of the critical needs of the Anchorage bowl, Mat-Su Valley and Kenai Peninsula, it would seem that there is little choice for over 50% of the residents of the state for cost effective power but to support this effort. For, without it, Anchorage will see some very dark days.

Therefore, our community, nearly to a person, is supportive of your efforts and willing to step up to the plate to help you bring this project to reality at the earliest possible time. If you have any needs where we can be of help, please do not hesitate to ask. We stand ready to go to the wall.

Best regards,

L. Alan LeMaster
