SUBJECT: Comments on Conditional Right-of-Way Lease ADL 229297

Dear Sir or Madam:

This letter is to state that we are strong supporters for granting a conditional right-of-way lease to ANGDA for a gas pipeline project from Glennallen to Palmer.

As 13-year residents and 7-year small business owners in Copper Basin area, we are extremely interested in a project to develop a gas line for the benefit of Alaskans. We are excited to see the progress ANGDA has made.

Doing business in rural Alaska is extremely difficult, in part due to the high cost of heating fuel and electric service, and it continues to become more difficult every day. The people who live in our area are very hesitate to spend dollars with the increasing cost of utilities. We are hopeful the Copper Basin region of Alaska may finally get some relief from these increases through the development of a gas line.

Thank you for the opportunity to comment.

Sincerely,

Nancy & Gary Heidelberg
